Advances in Polymer Technology

Journal of the Polymer Processing Institute

EDITOR-IN-CHIEF

Dr. Marino Xanthos
Polymer Processing Institute
at Stevens Institute of Technology
Castle Point on the Hudson
Hoboken, NJ 07030

EDITORIAL BOARD

Dr. Kris Akkapeddi
Allied-Signal Inc.
Morristown, New Jersey

Dr. P. G. Andersen
Werner & Pfleiderer Corp.
Ramsey, New Jersey

Mr. P. Carey Becker
Shell Oil Company
Norco, Louisiana

Dr. Lloyd A. Goettler
Monsanto Chemical Co.
Springfield, Massachusetts

Prof. C. G. Gogos
Stevens Institute of Technology
Hoboken, New Jersey

Prof. M. R. Kamal
McGill University
Montreal, Quebec

Dr. Stuart J. Kurtz
Union Carbide Chemicals
and Plastics Co., Inc.
Bound Brook, New Jersey

Prof. Morand Lambla
E. A. H. P.
Strasbourg, France

Mr. Martin H. Mack
Berstorff Corporation
Charlotte, North Carolina

Prof. A. Ya. Malkin
Research Institute for Plastics
Moscow, USSR

Prof. L. Mascia
University of Technology
Loughborough, UK

Dr. Thomas W. McCullough
Dow Chemical USA
Midland, Michigan

Dr. Reiji Mezaki
Mitsubishi Kasei Corp.
Chiyoda-ku, Tokyo
Japan

Prof. Dr.-Ing W. Michaeli
Institut für Kunststoffverarbeitung
an der RWTH Aachen
Aachen, Germany

Dr. Angelo Montagna
Exxon Chemical Company
Baytown, Texas

Dr. Chris Rauwendaal
Rauwendaal Extrusion
Engineering, Inc.
Los Altos Hills, California

Dr. Tadamoto Sakai
Japan Steel Works
Hiroshima, Japan

Prof. N. R. Schott
University of Lowell
Lowell, Massachusetts

Dr. Chi-Kai Shih
E.I. du Pont de Nemours, Co.
Wilmington, Delaware

Dr. Paul Soskey
EniChem America, Inc.
Research & Development Center
Monmouth Junction, New Jersey

Dr. J. M. Starita
Rheometrics, Inc.
Piscataway, New Jersey

Prof. Z. Tadmor
Technion-Israel Institute
of Technology
Technion City, Haifa
Israel

Dr. David B. Todd
Todd Engineering
Princeton, New Jersey

Prof. J. Vlachopoulos
McMaster University
Hamilton, Ontario, Canada

Prof. R. T. Woodhams
University of Toronto
Toronto, Ontario, Canada

EDITORIAL PRODUCTION, JOHN WILEY & SONS, INC.,
David Blount

Contents of Volume XII

Number 1, Spring 1993

Editor's Note 1
M. Xanthos, Polymer Processing Institute

FEATURES

Modeling of Membrane Inflation in Blow Molding: Neural Network Prediction of Initial Dimensions from Final Part Specifications 3
R. W. DiRaddo and A. Garcia-Rejon, Industrial Materials Institute, National Research Council of Canada

Synthesis of Polystyrene and Styrene Copolymers by Reactive Extrusion 25
W. Michaeli, A. Grefenstein, and W. Frings, Institut für Kunststoffverarbeitung

Alternative Procedures for the Recycling of Sheet Molding Compounds 35
S. H. Patel, K. E. Gonsalves, S. S. Stivala, L. Reich, and D. H. Trivedi, Stevens Institute of Technology

Blends of Polypropylene and Nylon 6: Influence of the Compatibilizer, Molecular Weight, and Processing Conditions 47
F. P. La Mantia, Università di Palermo

Encapsulation Process for Electronic Devices Using Injection Molding Method 61
T. Sakai, The Japan Steel Works

Assessing Polymer Crystallizability from Nonisothermal Crystallization Behavior 73
V. M. Nadkarni, N. N. Bulakh, and J. P. Jog, National Chemical Laboratory, India

Analysis of PVC Blends by Three-Dimensional Solubility Parameters 81
J.-C. Huang, D. C. Chang, and R. D. Deanin, University of Massachusetts Lowell

Mechanochemical Bonding of Hard-to-Bond Materials 91
V. L. Vakula and L. S. Genel, Moscow Institute of Applied Biotechnology, and V. N. Kestelman, JBK International

DEPARTMENTS

News of the Polymer Processing Institute 99

Number 2, Summer 1993

FEATURES

Viscoelastic Simulations of Extrudate Swell for an HDPE Melt through Slit and Capillary Dies 107
D. G. Kiriakidis and E. Mitsoulis, University of Ottawa

Biaxial Orientation of Poly(ethylene Terephthalate). Part I: Nature of the Stress–Strain Curves 119
P. Chandran and S. Jabarin, The University of Toledo

Biaxial Orientation of Poly(ethylene Terephthalate). Part II: The Strain-Hardening Parameter 133
P. Chandran and S. Jabarin, The University of Toledo

Biaxial Orientation of Poly(ethylene Terephthalate). Part III: Comparative Structure and Property Changes Resulting from Simultaneous and Sequential Orientation 153
P. Chandran and S. Jabarin, The University of Toledo

Effect of Solid-State Modified Polypropylene on the Physical Performance of Sawdust-Filled Polypropylene Composites 167
M. M. Sain and B. V. Kokta, Université du Québec à Trois-Rivières

Chemical Products from Cured Unsaturated Polyesters 185
G. Tesoro and Y. Wu, Polytechnic University, Brooklyn, New York

The Microwave Processing of Polymeric Materials 197
M. T. De Meuse and C. L. Ryan, EniChem America, Inc.

DEPARTMENTS

News of the Polymer Processing Institute 205

Announcements 213

Erratum 215

Number 3, Fall 1993

FEATURES

Sheet Coextrusion of Polymer Solutions and Melts: Comparison between Simulation and Experiments 217
A. Hannachi and E. Mitsoulis, University of Ottawa

Current Trends in CAE: Simulations of Latest Innovations in Injection Molding 233

K. Himasekhar, L. S. Turng, V. W. Wang, and H. H. Chiang, AC Technology, K. K. Wang, Cornell University

An Integrated Approach for Modeling the Injection, Compression, and Resin Transfer Molding Processes for Polymers 243

E. W. Liang, H. P. Wang, and E. M. Perry, GE Corporate Research and Development

Cross-Linking of Polypropylene by Peroxide and Multifunctional Monomer During Reactive Extrusion 263

B. K. Kim and K. J. Kim, Pusan National University

Failure Prediction of Fiber Reinforced Laminates under Hygrothermal and Mechanical In-Plane Loads 271

T. P. Philippidis, University of Patras, and P. S. Theocaris, National Academy of Athens

Solid State Processing of Polymers: A Review 281

J. P. Jog, National Chemical Laboratory, Pune, India

SPECIAL REPORTS

Incremental Drawing for Controlling Synthetic Fiber Structure, Properties, and Productivity 291

M. V. Sussman, Tufts University

Advances in Injection Molding of Fiber-Reinforced Thermoplastics During 1991—Part II: Processing, Design, and Manufacture 297

P. G. Kelleher, New Jersey Polymer Extension Center

DEPARTMENTS

News of the Polymer Processing Institute 313

New Books on Polymer Technology 325

Announcements 327

Number 4, Winter 1993

FEATURES

Numerical Analysis of the Resin Transfer Molding Process by the Finite Element Method 329

F. Trochu, R. Gauvin, and D.-M. Gao, École Polytechnique, Montréal

Theoretical Modeling of Dispersive Melting Mechanism of Polymers in an Extruder 343
H.-X. Huang and Y.-C. Peng, South China University of Technology

Pressure-Related Driving Forces in the Fully Filled Nonintermeshing Twin Screw Extruder 353
D. I. Bigio, M. R. Ramanthan, and P. Herman, University of Maryland

Intelligent Processing of Polymer Sheets for Calendering 361
A. A. Tseng, W. H. Shih, and C. L. Thomas, Drexel University, and S. J. Chen, Temple University

Computer Simulations on Polysilanes: A New Method for Modeling the Energetics and Dynamics of Their Thermochromic Transitions 379
W. J. Welsh, University of Missouri-St. Louis

The Precise Determination of Polydispersity Index (PI) in Rheological Testing of Polypropylene 389
S. W. Shang, Himont, U.S.A., Inc.

SPECIAL REPORTS

Development of an Expert System for Injection Molding Operations 403
S. Kameoka, N. Haramoto, and T. Sakai, The Japan Steel Works

PLASSEX: An Expert System for Plastics Selection 419
D. Agrawal and P. T. Vasudevan, University of New Hampshire
